Race

People are often described as belonging to a certain “race” based on how others see and behave toward them. Notions about who belongs to what race are usually based on physical features such as skin colour. Ideas about race are often imposed on people by others in ways that can affect their life experiences and how they are treated.

Race is often confused with ethnicity, but there can often be several ethnicities within a single racialized group. In our society, people are often described by their race or racial background.

Disability

Some people identify as having a disability because of a permanent or long-term health condition that makes it difficult for them to function in an environment that is not fully inclusive and accessible. A person's disability may be diagnosed or not diagnosed. It may be hidden or visible. Some students who have disabilities may have a special plan at school to help them (Individual Education Plan or IEP), but some do not.

A disability may be physical, mental, behavioural, developmental, sensory, communicational or a combination of any of these. Barriers such as settings that are hard to access (like school, stores, or public places), negative attitudes, and barriers to information contribute to a person's experience of having a disability.
